USING THIS GUIDE

Introduction

Overview

01

OVERVIEW

Brand overview

The Ag Leader brand consists of key elements that, when used consistently at every point of contact with customers, enhance recognition and recall of Ag Leader as a pioneer and global leader in precision agriculture. The brand standards that follow have been developed to clearly define the look and feel of our identity, as well as establish parameters for acceptable use of the Ag Leader brand elements.

Ag Leader’s strong brand equity, which is built through diligence and consistency, is priceless in the marketplace. How we apply our brand across all channels of communication differentiates us from competitors and influences how we are perceived by those who encounter us. Creating materials that support the Ag Leader brand requires commitment and watchfulness to ensure every experience, interaction, and communication is not only consistent but also identifiable as part of Ag Leader’s unique image and personality.

Your role

As an Ag Leader dealer/distributor, you are an important extension of our brand. You build up and reinforce Ag Leader recognition with every customer who receives any communication that includes the Ag Leader logo, product, or service.

The Dealer Visual Brand Guide has been developed to empower you to execute the Ag Leader brand correctly. It is the foundation for how you will communicate about Ag Leader beyond what is provided in the Digital Asset Bin (agleader.canto.com/v/DigitalAssetBin) and will serve as a reference point in your efforts to raise brand awareness.

Within this guide, you will also find co-branding guidelines to help you properly apply the Ag Leader brand alongside your brand’s name and/or logo.

Please direct any questions or comments related to the Ag Leader brand to dealermarketing@agleader.com.

WORKING WITH OUR LOGOS

Our Logos

Logo System / Brandmark / How to Use / Co-branding / Ag Leader Technology / Incorrect Usage

02

LOGO SYSTEM

These four variations make up the Ag Leader logo system

Our logos are the most visible and impactful representation of the brand. As such, it is important that the logo system be used correctly and consistently to strengthen brand awareness and build recognition.

The following pages detail how to use the full logo system appropriately.

To download the official Ag Leader logos, visit: agleader.canto.com/v/DigitalAssetBin.

Wordmark

Horizontal Lockup

Stacked Lockup

Brandmark

BRANDMARK

Our brandmark provides flexibility and storytelling

The addition of the Ag Leader brandmark allows us flexibility to show up well across all mediums and spaces. It also serves as our unique visual identifier and a tool for storytelling, bringing our brand and our products full circle.

The mark represents the technology we produce and the view you’d see when using our high-performance displays in the field.

Additionally, the shape of the mark resembles a capital “A”, while the arrow represents the “Leader” in Ag Leader.

As a whole, the mark points upward and the field rows give it movement, communicating our continuous drive to innovate as we take precision ag into the future.

HOW TO USE

Preferred usage of the logo system

The full logo system allows flexibility in many spaces; however, it’s important to follow our preferred usage to maintain recognition and consistency. Please refer to the co-branding guidelines on page 11 for further clarity.

Horizontal Lockup

- Used in most scenarios where there is ample horizontal space allowing proper readability and visibility
- Should not be used in combination with other Ag Leader logos (such as product or Blue Delta Dealer logos), as the lockup becomes distracting and competes for attention
- See page 11 for appropriate co-branding usage

Stacked Lockup

- Used in scenarios where horizontal space is somewhat limited, but vertical space is plenty
- Should not be used in combination with other Ag Leader logos (such as product or Blue Delta Dealer logos), as the lockup becomes distracting and competes for attention
- See page 11 for appropriate co-branding usage

Wordmark

- Used in place of the horizontal lockup when horizontal space is somewhat limited and readability becomes priority
- Can be used in combination with Ag Leader product logos and Blue Delta Dealer logos
- See page 11 for appropriate co-branding usage

Brandmark

- The brandmark on it's own is ONLY approved for use in corporate digital platforms
- Not available for download in the Digital Asset Bin

HOW TO USE

Clear space

When placing the Ag Leader logo, please be aware of space considerations. Leave enough room for the logo to breathe, minimizing distractions.

Clear space is equal to the x-height of the “e” on all sides. These guidelines should be followed for the horizontal lockup, stacked lockup, and wordmark. The dotted lines below represent appropriate clear space usage.

Size requirements

Readability of the logo must never be compromised. Size should be relative to the medium. However, there are some instances when minimum size must be used.

Please avoid reducing the logo below these recommendations. Measurements depend on application.

Minimum width	
1.25 inches for print (or digital PDFs) 90px for web and digital applications	
1 inch for print (or digital PDFs) 72px for web and digital applications	
1 inch for print (or digital PDFs) 72px for web and digital applications	

HOW TO USE

Color and contrast considerations

Logos should be represented in Ag Leader Blue or White depending on contrast considerations. The black logo is strictly reserved for applications that don't allow color (e.g., newspaper, black and white print, and select promotional items); it should not be widely used.

Ag Leader Blue
Use on white or light colored backgrounds.

White
Use on mid-tone or dark backgrounds.

Black (limited use)
Only use in instances where color is not allowed.

CO - BRANDING

Dealer/distributor co-branding guidelines

When the Ag Leader logo is being used with a dealer or distributor's name or logo, the following co-branding guidelines should be followed.

When space allows, we prefer dealer/distributor logos be clearly separated from the Ag Leader logo, meaning logos should not be adjacent or in direct relation to one another when possible.

For example:

- On apparel, the Ag Leader logo may be placed on the opposite chest, sleeve, or back of the garment.

- On print mediums, the Ag Leader and dealer/distributor logos may be placed front and back, left side and right side, or top and bottom respectively.

If this clear separation is maintained, the Ag Leader logo lockup may be used.

If space is limited, dealer/distributor logos may be used alongside the Ag Leader wordmark, following these parameters:

Logos should be separated by a 1px (minimum) line, with space equal to the x-height of the "e" in our logo (see page 9) on either side of the line.

- If arranging logos horizontally, the dividing line should be at least the height of the Ag Leader wordmark.

- If stacking logos vertically, the dividing line should be at least half the width of the Ag Leader wordmark.

When logos are placed adjacent, the Ag Leader wordmark **must** be used.

AG LEADER TECHNOLOGY

Ag Leader Technology logo use guidelines

Ag Leader Technology, Inc. is our corporate business entity name; therefore, it must be formally used in some instances at the corporate level only.

If you are using any of the Ag Leader Technology logos pictured to the right, please discontinue use and follow the logo guidelines stated on pages 8 to 11 in this guide.

For questions on logo usage, please contact dealermarketing@agleader.com.

INCORRECT USAGE

What to avoid when using our logos

Our logo system should be used as stated in this guide. Please do not alter or change our logos in any way. Below are some examples of what not to do.

Do not stretch, squish, or distort logo proportions.

Do not recolor or attempt to reproduce the logo in any way.

Do not add a drop shadow or other visual effects to the logo.

Do not use on backgrounds that are busy or provide insufficient contrast.

Do not tilt or change the orientation of the logo. *In limited scenarios, rotating 90° might be necessary.*

Do not add a tagline to any of the logo versions.

Do not rearrange or resize logo elements to create new versions.

Do not use the Ag Leader Technology logo.

WORKING WITH COLOR

Brand Palette

Our Palette

03

OUR PALETTE

How to use the brand palette

Consistent use of our color palette is critical to recognition of the Ag Leader brand. Blue is core to our visual identity and helps people quickly identify us.

Each color is built for use in print and digital settings. Please follow the guidelines below to ensure you’re using the correct color codes for your application.

- Pantone (PMS): Primarily used for color matching, but can be used in select print mediums when specified
- CMYK: Print
- RGB or Hex: Digital and web

Primary Colors

To maintain brand consistency, the primary palette should be established whenever possible. Though it doesn’t always need to be dominant, our primary Ag Leader Blue should be used in meaningful ways across all color materials. Dark Gray and White are our neutral anchoring colors used for text and to provide contrast in large spaces.

Ag Leader Blue PMS 2945C CMYK 100/73/20/5 RGB 0/76/151 HEX #004C97	Dark Gray PMS 425C CMYK 66/56/53/29 RGB 84/88/89 HEX #545859	White CMYK 0/0/0/0 RGB 255/255/255 HEX #FFFFFF
--	--	--

Secondary Colors

Our secondary colors are used to provide contrast and depth to our palette. They can be used as floods of color, to break up information, or to accent and highlight.

Bright Blue PMS 6120C CMYK 71/19/4/0 RGB 58/165/213 HEX #3AA5D5	Navy Blue PMS 295C CMYK 100/84/36/39 RGB 0/40/85 HEX #002855	Light Gray 10% Black CMYK 0/0/0/10 RGB 230/230/230 HEX #E6E6E6
---	--	--

WORKING WITH TYPE

Typography

Our Typefaces

04

OUR TYPEFACES

Primary fonts

The Figtree family of fonts should be used across all Ag Leader print and digital advertising materials.

Figtree is a clean, modern sans serif typeface that allows maximum readability with a diverse range of weights and italics available for use.

Figtree can be downloaded from the Digital Asset Bin.

Figtree

WORKING WITH PHOTOGRAPHY

Photography

Best Practices / Product Photography

07

BEST PRACTICES

Photography dos and do nots

If possible, we encourage dealers/distributors to use photography that best represents their business and geographical region. We also have a library of photos available for use in the Digital Asset Bin. When selecting and styling imagery featuring our products, please follow these best practice guidelines.

Do use the high-quality photos available in the Digital Asset Bin.

Do use photos that feel natural and help bring our products to life.

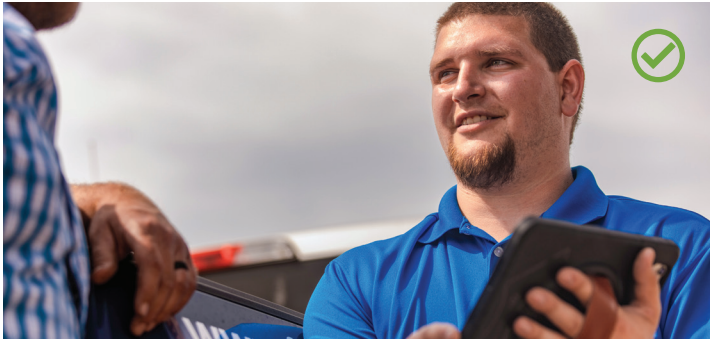

Do not use photography featuring outdated technology.

Do not picture unattractive, poor quality equipment.

Do use photos depicting real-life interactions with our products.

Do use photos that display positive experiences and emotion.

Do not use cheesy, cliché, or unnaturally posed photography.

Do not stretch, squish, or distort photo proportions.

PRODUCT PHOTOGRAPHY

Isolated product images

While lifestyle photography helps tell our story, it's not always easy to capture the physical product behind the operation — this is where our product images come into play. These images allow our audience to clearly see the physical product or solution for purchase.

Please use our official product photography located in the Digital Asset Bin. Do not attempt to shoot or recreate your own.
